## Grading Procedures:

### *Assessment for Learning Policy:*

Many in class assignments will be used to assess student progress in class. These are low stakes and intended to provide constructive feedback. Many of these assessments will include written constructive comments for improvement from the teacher. It is expected that students complete all of these assignments.

### *Assessment of Learning Policy:*

Quizzes, exams and in-class essays are all types of assessments that will be used in calculating a final grade for each student. All grades in the course are cumulative. Assessments in each category below will be averaged throughout the year.

### *Grade Determination:*

Term grade determination: Grade will be based upon evaluations conducted throughout the course. This portion of the grade will reflect the student's most consistent level of achievement throughout the course.

*Final grade determination:* Grade will be based on the accumulation of term grade evidence and a final examination administered at the end of the course (where applicable; this exam will be based on an evaluation of all units of the course). This grade will reflect the student's most consistent level of achievement throughout the course.

### **Appeals Process**

Should a situation arise where a student is not satisfied with an assessment outcome, first discuss the matter with the teacher outside of class time. If the teacher and the student are unable to resolve the issue, then the teacher will approach another teacher to assess the assignment. (The teacher will not have prior knowledge of the student's name or the previous grade for the given assignment). If there is still an issue, a meeting will be set up between the student, teacher, parents, and administration to resolve the matter. The commencement of an appeal must occur in a timely manner; within 48 hours of receiving the marked assignment. In return, the appeal process will be completed as soon as possible.

### **Course Evaluation**
